Cloud Readiness Assessment

Are You Ready for Cloud?

Start with our Cloud Readiness Assessment

The journey to Cloud can be challenging as it impacts IT strategic direction, organisational models and business continuity.

Compounding the change to Cloud are myths which can make the challenge greater...

- On-Premise functionality is richer than Cloud
- Cloud is buggy and unreliable
- It will cost more to move to Cloud than to continue on-premise
- Cloud is not secure
- To move to Cloud, all systems need to be in the Cloud for them to work
- Heavily customised on-premise solutions can't move to Cloud
- Oracle Cloud does not have the breadth of products that on-premise does.

Let us help you dispel the myths.

Our clients that have completed this journey with us have realised the many cost and business benefits that Cloud brings; availability, agility, speed of implementation, depth of business functionality, reliability, lower total cost of ownership and reduction in risk. Not to mention the positive impact on the bottom line.

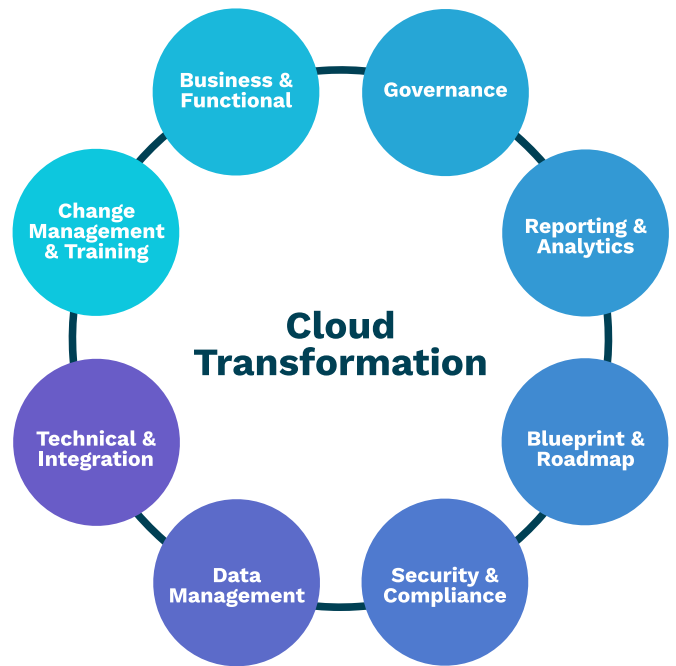

We advise that clients moving from on-premise to Cloud start with a Cloud Readiness Assessment. The assessment offers a flexible and logical approach across people, process and technology to help you understand and plan for your move to cloud and is led by the Certus APAC team.

Applicable for use by all Oracle HCM and ERP on-premise clients, our Cloud Readiness Assessment is for those dynamic organisations about to begin the Cloud journey and also for organisations who may already have some Cloud solutions in place that want to progress further.

For those who are considering making their initial move into the cloud, the assessment is an opportunity to fully understand what HCM and/or ERP Cloud will mean to your organisation from a technology, and also from a people and process viewpoint.

For those organisations that have cloud delivered services in place, the assessment will help you to start planning for the next stage in the Cloud journey and how this will impact your existing people and processes.

The purpose of the overall assessment is to validate Oracle’s Cloud application functionality against your high-level business and system processes. This, along with the other deliverables in the Cloud Readiness Assessment will provide you with the necessary information to assess the costs, benefits and impact of moving onto a Cloud solution.

Recommended practices will be applied to standard functionality in Oracle Cloud, which will be used in preference of customising the software. Oracle Cloud includes many configuration options to meet specific business needs and we will guide you through the options and recommend appropriate choices.

Certus has a proven approach which informs and de-risks the transformation process, providing the necessary information and the confidence to proceed.

About Us

Certus APAC is an Oracle Platinum Partner specialising in end to end implementations of Oracle Human Capital Management (HCM), Enterprise Resource Planning (ERP) and Talent Management solutions.

Certus APAC was founded in 2013 specialising in the delivery of Oracle HCM, Talent Acquisition and ERP Cloud solutions. We are 100% focused on Cloud.

Certus APAC operates globally delivering projects in numerous locations including the Americas, EMEA and Asia Pacific.

Our aim is to ensure that our clients enjoy a successful implementation and are set for the future.
